PROFESSIONAL SUMMARY

Data & Analytics professional with **6+ years** of experience driving measurable business impact through **predictive modeling**, **data architecture, and governance solutions**. Proven ability to lead analytics teams while collaborating cross-functionally with diverse stakeholders to deliver **enterprise-scale initiatives** that optimize operations, reduce costs, and improve performance. Expertise in Python, SQL, Power BI, and cloud platforms, **complemented by emerging AI/ML capabilities including LLM orchestration and prompt engineering**. Deep domain knowledge in financial services and collections analytics. Adept at translating complex data into actionable strategies that inform executive decisions and deliver quantifiable results.

KEY SKILLS

TECHNICAL SKILLS & TOOLS

Python | SQL | Power BI | Tableau | Excel | SAS | Azure | GCP | Predictive Modelling | Data Science | Feature Engineering | Machine Learning | LLM Orchestration | Prompt Engineering | AI-Augmented Workflows

SOFT SKILLS

Leadership | Stakeholder Management | Cross-functional Collaboration | Data Storytelling | Critical Thinking | Accountability | Change Management

DOMAIN EXPERTISE

Credit Risk & Collections | Financial Services / BFSI | Data Architecture & Governance | Portfolio Management

AWARDS & RECOGNITION

⭐⭐

Encore Honors Gold Award
Collection Optimization + AM Skill Utilization

🏆

President's Club Nominee
Top Performer Recognition (30 out of 7350)

🌟

Star Analyst
Customer Retention Project

EDUCATION

M.Tech - Civil Engineering
IIT Kharagpur
2016 – 2018

B.Tech - Civil Engineering
COEP Pune
2011 – 2015

PROFESSIONAL EXPERIENCE

Manager - Strategy Analytics | Encore Capital Group — July 2025 – Present

Gurgaon, India

Engage VOICE Dialer Migration

Spearheading enterprise-scale infrastructure migration from legacy dialer to VOICE platform. Owned end-to-end migration strategy including data architecture, compliance framework mapping, reporting logic design, and operational workflow definitions. Implemented phased rollout with **near-zero disruption** to business operations.

Enterprise Budget Transformation

Designed and deployed a centralized budgeting framework to standardize financial planning across collection verticals and channels of $2B revenue. Replaced a decentralized bottom-up approach where multiple business units

independently built annual collection forecasts and cost-to-collect projections. The new framework—developed over four months—achieved a **93% reduction in man-hours** within the annual six-week budgeting cycle, with **~98% accuracy**.

Compliance Governance Framework

Designed and implemented data governance system to monitor regulatory adherence across debt collection operations. Established automated alert mechanisms and audit reporting infrastructure. Sustained **80% reduction** in monthly compliance alerts over 3 years.

Skip Optimization for Outbound Dialing

Led A/B testing across multiple vendors to optimize skip processes—sending consumer details to vendors for updated phone numbers to improve reach quality for outbound dialing. Identified optimal combination of 3 vendors used sequentially in the same cycle. Resulted in **12% reduction in skip process costs** with **4% improvement in collections performance**.

Deputy Manager - Strategy Analytics | Encore Capital Group — March 2023 – July 2025

Gurgaon, India

Dial Optimization Model

Led the development of a data-driven analysis framework for outbound dialing across all outbound teams. Created a dynamic dial value cut model calibrated for different account quality segments, with weekly refresh cycles. Result: Reduced monthly dialing volume by **28.5%** while sustaining collection performance with negligible impact.

AM Skill Utilization Model

Led end-to-end design and deployment of a three-phase incentive framework across all workgroups at the India site. Developed a data-driven hierarchy using different performance parameters to rank workgroups for equitable budget allocation. Designed an incentive calculation model aligning account manager skills with business objectives while maintaining budget constraints. Created a standardized goal-setting methodology to eliminate biases and improve AM mobility across workgroups. Result: Optimized skill utilization; contributed to **6% growth** in India site collections.

Other BAU Projects

Conducted rigorous A/B testing frameworks to evaluate business strategies, driving data-driven decision-making across collection verticals. Defined KPIs, created report logic, and built different dashboards using Power BI and Tableau to visualize key business KPIs and support leadership decisions.

Assistant Manager - Business Analytics | GoMechanic — June 2022 – March 2023

Gurgaon, India

- Built a predictive model (Logistic Regression) using order and customer data, increasing customer retention by **28%**
- Automated daily reporting using Python, SQL, and NoSQL, improving efficiency and compliance
- Conducted NLP-based text analysis on customer feedback, leading to process improvements
- Developed Tableau dashboards for real-time tracking of customer engagement

Data Analyst | InfoDeal Technologies — October 2019 – June 2022

Pune, India

- Designed custom BI dashboards to track business KPIs, improving strategic decision-making
- Conducted A/B testing on website features to evaluate impact on customer engagement and revenue
- Developed real-time monitoring systems to track key business metrics and alert teams

Senior Design Engineer | Larsen & Toubro — July 2018 – October 2019

Mumbai, India

- Worked as Pavement & Geometric design Engineer for Highways and Airport projects
- Led requirement gathering for infrastructure analytics and statistical modeling of pavement deterioration
